A: You can use windows search command in cmd. Windows Search bar: Type the following, cmd /? for help, or use the Windows key + Alt + Ctrl + F together. search c:\repository\test\abc.txt OR Go to your office explorer, there are two bars at the bottom right corner of window, click that bar and type the command search c:\repository\test\abc.txt After this type cd and the folder path you want to search and press enter. 1. Field of the Invention The present invention relates to an information processing apparatus, a history information recording method, a information recording medium, a program and a recording medium, and more particularly, to an information processing apparatus which acquires information from a network, a history information recording method which records history information on an information recording medium, a program for the information processing apparatus and a recording medium. 2. Description of the Related Art Conventionally, in an information processing apparatus such as a personal computer, a history information recording program which records history information on an information recording medium such as a magnetic tape or a

memory has been widely used. For example, Japanese Laid-Open Patent Application No. Hei 6-303582 discloses an information processing apparatus which collects the history information for a specified use by recording personal information at predetermined timings and time intervals during execution of software application, and for each execution of software application, displaying the history information to allow a user to confirm the progress of the execution of the software application in detail. The history information recording program disclosed in Japanese Laid-Open Patent Application No. Hei 6-303582 has a history information recording format in which an operation is recorded as a time-series item for each use of an application in execution. If the history information recording format is used, the history information recording program is convenient. However, there is a problem in that the user of the above-described conventional information processing apparatus cannot easily view the history information recorded on the information recording medium which is in the status of being read out from the information recording medium into the information processing apparatus and being displayed on the display of the information processing apparatus. For example, if the user of the conventional information processing apparatus simply wants to know the content of the history information stored in the information processing apparatus, it is difficult to show the contents of the history information and the contents of
